

Configurator

“ Our goal is to be easier to do business with than anyone else. Infor has enabled us to leapfrog our competitors. ”

VP OF OPERATIONS, WESTERN REGION, LEADING NATIONAL WINDOW AND DOOR MANUFACTURER

Be enterprising.

No matter how complex your multi-site, global operations, you must be able to respond quickly and accurately to customer demand. That includes producing customized products on the tightest of schedules to the most stringent customer specifications. It's simply what the marketplace has come to expect these days, and enterprising manufacturers not only meet the expectations; they exceed them with unprecedented speed and agility.

The key is having the right technology support across the entire interest-to-order cycle for customized products.

Leverage experience.

At Infor™, our manufacturing professionals—many with more than 25 years of experience—are helping companies like yours solve their toughest configuration challenges. That experience is built into Infor ERP SL (formerly SyteLine) Configurator, a powerful product configuration engine that helps your sales channels streamline the interest-to-order cycle for customized products. We can help you:

- Improve order accuracy.
- Ensure every order is feasible.
- Reduce lead times.
- Meet customer expectations and increase sales.

Get business specific.

With Configurator, you get a solution that is built, serviced, and managed by manufacturing professionals to help you deliver customized products with speed and accuracy.

The integrated Configurator component of Infor ERP SL provides a holistic approach to the design, sales, and production of customized products. It ensures configured orders are feasible for the production department by providing clear visibility across inventory and schedules. And built-in rules and constraints make the selection and configuration of even the most complex products intuitive and error-free. Only valid combinations of features, options, and dimensions are created, quoted, and ordered.

Configurator includes a rich graphical user interface that provides your sales channels with all the tools they need to easily tap the solution's full functionality when working with customers, including:

- *Product configuration*—a powerful engine for guided selection, configuration, pricing, and document and data generation.
- *Product visualization*—dynamic generation of configuration-specific 2D models, 3D models, and rendered images.
- *Interest capture*—tools to capture your customers' attention, imagination, and business.
- *Requirements capture*—tools to make it easy for professional designers to create specifications for your products.
- *Quote and order management*—comprehensive support for multi-level sales channels and self-service purchasing for customers.
- *Multiple deployment models*—online, distributed, or combined approaches.
- *Enterprise integration*—data synchronization, transactions, and web services.

Built on the widely deployed Microsoft® .NET technology platform, Infor ERP SL solutions feature an advanced software architecture that is reliable, scalable, and easy to manage. They are designed to integrate smoothly with your existing environment, while providing the flexibility to adapt to changing business needs over time.

See results now.

Configurator's modular architecture lets you get the right tools into the hands of all your users—right away. All Infor ERP SL solutions require less customization, a short implementation time, and faster time to value. That means an immediate return on your investment. From the very first day, you'll see improvements in visibility and transparency of data—and in your ability to meet escalating customer demand.
